# SocialCast Layouts

Slideshow

This is the most standard display. Offers different transitions between content. Focuses on one specific piece of content at a time.

Q & A Wall

Holds the features of the slideshow, but requires manual switching between pieces of content.

Grid

Offers multiple pieces of content at once. Smaller in detail, but more present. Sits stagnant until more posts are approved.

Mosaic

With this theme, you need a background image. That image is then turned into a mosaic of your content. Does not support text posts. This is great for an event logo as a background.

Classic
Like grid, but more of a manual version. Need to control manually. Suggestion would be to use slideshow over classic.

Atmosphere
This displays posts individually in the center of the screen surrounded by floating dots.

Photo Slideshow
This displays posts as photos that transition from right to left individually. The text is displayed at the bottom of the screen.

Gem
This displays content as Gems across the video screen. Different content will transition to become the focus, similar to Waterfall. This does not support text posts. This is great for photo posts.
